MEMORANDUM FOR THE RECORD

SUBJECT: Record of Decision for the Recertification of the Collaboration and Public Participation Technical Center of Expertise

1. The Collaboration and Public Participation Center of Expertise located at U.S. Army Corps of Engineers, Institute for Water Resources, Alexandria, VA is recertified based on my review that this center continues to be productive and has unique or specialized capabilities as required in ER 1110-1-8158. This TCX eliminates redundancy, optimizes use of specialized expertise, improves services to its customers and enhances Corps-wide consistency.
2. These findings are documented in the Recertification Report which was completed by Dr. Stacy Langsdale on 5 April 2023.
2. The Director of the U.S. Army Corps of Engineers, Institute for Water Resources, Alexandria, VA has endorsed this recertification and expresses his commitment to providing the resources necessary to maintain the technical competencies and capabilities of this TCX.
3. As HQ Proponent of this TCX, I, Mr. Joseph Redican, 202-761-4523, have reviewed the attachments and approve the responses attached. I recommend your approval for recertification of this TCX.
